ABOUT

Powering content and AI experiences, Sodaclick is a cloud based platform for creating dynamic digital signage content and intuitive solutions. The foundations of Sodaclick are the 'Create, publish and update' mantra, that results in high-impact, dynamic and intuitive content through the single URL mechanism.

At the core, is a simple, yet powerful, all inclusive HTML5 content creator with over 3 million royalty free assets (CCO) for creating high quality, and free flowing dynamic digital signage content, all without a single line of code. Slides are both dynamic and infinitely editable, with automatic 'non CMS' content updates, all within the platform.
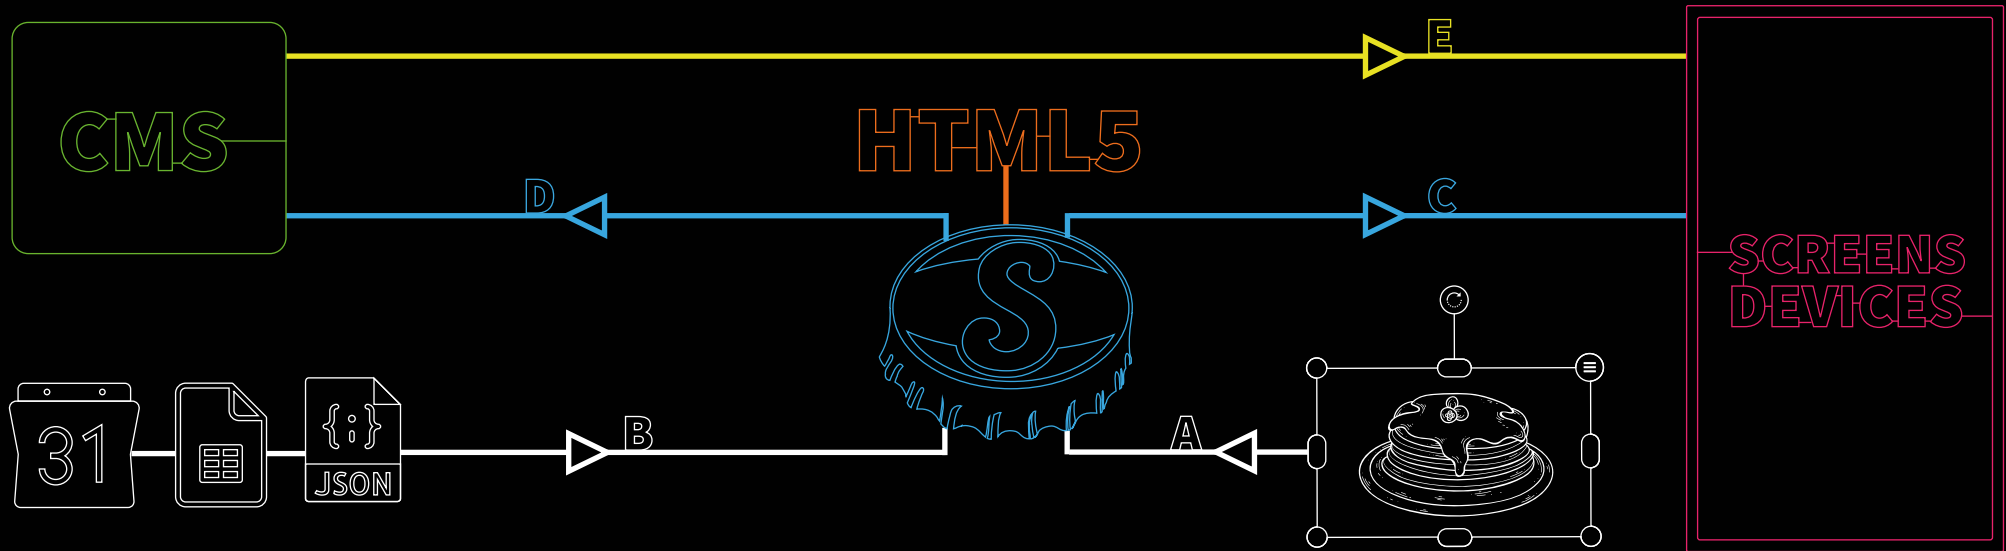

As well as fully customisable, zone free, 'from the grounds up' content, access to Sodaclick's 4K HTML5 template gallery covers many verticles, and are fully editable in both open, free form graphics and the more granular, restricted edit modes. Through the Sodaclick creative platform, output playlist, touch, data and voice enabled solutions through a single URL, for your digital signage screens, menu boards, POS and kiosk systems.

Driving the future of contactless digital signage, Sodaclick uses multilingual neural net voice recognition with natural language processing and AI to create immersive consumer experiences across multiple verticals including retail, hospitality, education, public spaces, and QSRs.

THE SODACLICK FLOW

Powering Content And AI Experiences

A. Create, publish and update, dynamic HTML5 digital signage content from any device.

B. Supercharge your graphics with dynamic data, through various apps, including, Google Calendar, Google Sheets, and powerful JSON API requests, for limitless possibilities.
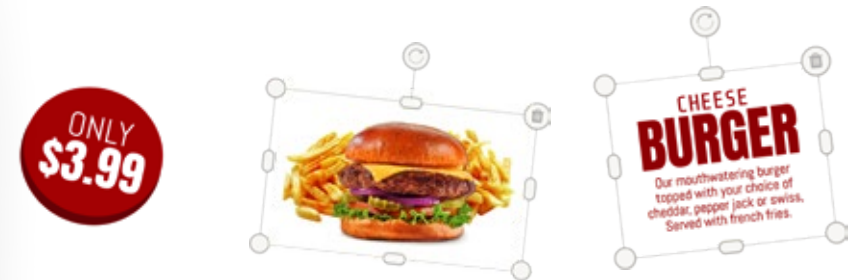

C. Turn any device into a Sodaclick digital signage web player Input the unique, HTML5 URL directly into the devices native web browser without the hassle of pairing

D. Simply create your content solution, and input your secure, MLS URL into your CMS network. You can now display your HTMLS content solution in a scheduled playlist or a multizone project as a web asset/widget

E. Schedule and post your HTML5 content solution through your CMS onto your connected screen/device.
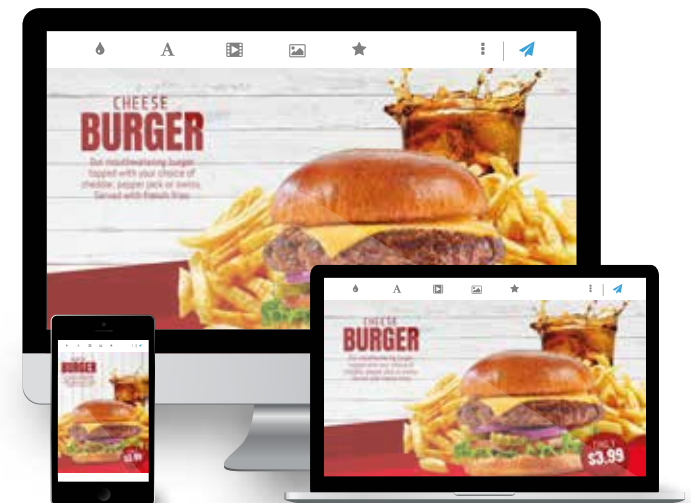

CREATE CONTENT, WITHOUT A SINGLE LINE OF CODE

Create, publish and update, free flowing, dynamic HTML5 digital signage content from any device.

Design customised 4K content to suite your brand in minutes with access to an inclusive image search* and fine control over your brand assets, fonts and colours.

*Over 3 million high quality, royalty free assets (CCO)

SODACLICK TEMPLATE GALLERY

OWN THE CREATIVE PROCESS

As well as offering a powerful cloud based content application to create on, Sodaclick's team of designers regularly upload high quality content for you to enjoy. Fully editable, these templates help you deliver your brands message quickly and effectively.

16:9 | 9:16 CONTENT

Templates are designed with landscape and portrait digital signage screens in mind for maximum exposure of your brand message.

ONLY
$3.99

*Resolution is relative to the content and its use of high resolution assets. All text and vector graphics are upscaled without loss of quality, and is subject to hardware compatability.

DATA DRIVEN GRAPHICS
Intelligently influence your content

Supercharge your graphics with dynamic data, through various apps, including, Google Calendar, Google Sheets, and powerful JSON API requests, for limitless possibilities.

With these app connections, create and customise your content once, and watch, live, as your dynamic data shapes your digital signage experience.

Data sources can be set up in Sodaclick to influence change in the contents text and asset attributes for various use cases, such as live football scores, arrival / departure times, queue management systems, IOT sensory feedback data and many others.

POSTING TO A CONNECTED SCREEN

Sodaclick CMS

Manage and deploy your content across your digital signage network through the Sodaclick PWA or native player.

Alternatively you can simply input the contents unique HTML5 URL directly into a devices native web browser for instant playback.

Through Sodaclick's 'flexi license' mechanism, transferring a license from one device to another, is simple and intuitive.

External CMS

Simply create your content solution, and input your secure, HTML5 URL into your CMS network.

You can now display your content solution in a scheduled playlist or a multizone project as a web asset / widget, through your CMS player.
